For diagnosis of urinary tract infections by demonstrating microbes in urine

Uricult® Products

Uricult 67404
- CLED medium for total bacterial counts
- Selective MacConkey medium for gram-negative bacteria

Uricult Plus 67465
- CLED medium for total bacterial counts
- Selective MacConkey medium for gram-negative bacteria
- Selective enterococcus medium for enterococci; group B streptococci may also grow on this medium

Uricult Trio 68197
- CLED medium for total bacterial counts
- Selective MacConkey medium for gram-negative bacteria
- E. coli medium for gram-negative, β-glucuronidase-producing organisms, such as E. coli. Certain yeasts may also grow on this medium.

IT’S SO EASY TO USE!

For more detailed information, please consult the instructions for use.
Organisms on different media

- **Enterococcus / MacConkey Medium**
  - Enterococcus
  - Group B Streptococcus
  - Staphylococcus albus
  - Staphylococcus saprophyticus
  - E. coli
  - Entero bacter
  - Klebsiella
  - Proteus
  - Pseudomonas
  - Mixed growth

- **CL ED Medium**
  - Enterococcus
  - Group B Streptococcus
  - Staphylococcus albus
  - Staphylococcus saprophyticus
  - E. coli
  - Entero bacter
  - Klebsiella
  - Proteus
  - Pseudomonas
  - Mixed growth

**Gram-positive bacteria**

**Gram-negative bacteria**

**Colony densities** *Enterococcus CFU/ml*

- **CL ED Medium**
  - 10^3
  - 10^4
  - 10^5
  - 10^6
  - 10^7

- **Enterococcus / MacConkey Medium**
  - 10^3
  - 10^4
  - 10^5
  - 10^6
  - 10^7
